

More Information

Sustainable Practices

Sustainable practices means making business decisions which meet current needs without compromising the ability of future generations to meet theirs.

We are committed to the following sustainable practices:

Purchasing

Apply sustainability criteria when buying supplies, equipment and services.

Reduce, Reuse and Recycle

Minimize the use of paper in storing data, printing, copying and communications.

Reduce the use of disposables and packaging, reuse equipment and supplies where feasible and recycle as much as possible.

Energy

Reduce energy consumption and choose the most efficient alternatives in heating/cooling, lighting and equipment.

Commuting

Encourage the use of mass transit, carpooling, walking and cycling by appropriate incentives to lawyers, students and staff.

Office Space

Use our work space more efficiently to reduce our footprint in proportion to the number of lawyers, students and staff.

Specify materials that are high in recycled content, recyclable or biodegradable and durable.

Education

Develop an incentive program to encourage our lawyers, students and staff to support this policy.

Encourage ideas and feedback from everyone on how to improve our sustainable practices.

Measurement

Assess our footprint as a business and measure our success in reducing it from year to year.

Outreach

Share our ideas and experience in developing and implementing sustainable business practices with the legal and business community at large.
