

Sustainable Development

About this Area of Expertise

The term 'sustainable development' involves an interplay between economic, social and environmental issues.

We have growing expertise in this area and can provide advice on a wide range of business, legal and regulatory concerns, including project planning and investment, emissions trading, regulatory proceedings and licensing, green building and community development, power purchase and sale, environmental assessments, land use and rights of way, the movement and disposal of hazardous wastes and materials, the development of renewable energy projects, First Nations priorities and the financing of new technologies.
